

An Important Order from the War Department.

WAR DEPARTMENT, Washington, August 19.
All commanders of Regiments of volunteers accepted by this department in the States of Pennsylvania, New Jersey, New York, Connecticut, Massachusetts, Vermont, Rhode Island, New Hampshire, and Michigan, will take notice of, and conform promptly to, the general order this day directed to the Governors of the States above named, which is as follows:

By direction of the President of the United States, you are urgently requested to forward, or cause to be forwarded, immediately, to the city of Washington, all volunteer Regiments or parts of Regiments at the expense of the United States Government, that may be under immediate control, or by acceptances issued direct from the War Department, whether such volunteers are armed, equipped, and uniformed, or not.—The officer of each regimental organization that may not be full shall leave recruiting officers at their rendezvous, and take such other measures as shall be necessary to fill up their ranks at the earliest date possible. All officers of volunteer regiments, on arriving, will report to the commanding general, who will provide equipments and other supplies necessary for their comfort. To ensure the movement of troops more rapidly than might otherwise be done, you will please confer with and aid all officers of independent regiments in such manner as may be necessary to effect the object in view. All clothing and supplies belonging to, or contracted for, the several regiments, shall be forwarded to Washington for their use, a detailed report of which shall be made to the commanding general. (Signed.)

SIMON CAMERON, Sec'y of War.

All the military departments composed of the States of Delaware and Maryland and portions of Virginia, together with the city of Washington have been united in one grand department under command of Major General McClellan. As a consequence, Major Generals Dix and Banks are thus placed in subordinate military positions. Fortress Monroe is not included in the new arrangement.

The State department has just issued the following notice, addressed to all whom it may concern:

Until further notice no person will be allowed to go abroad from a port of the U. S. without a passport either from this department or countersigned by the Secretary of State. Nor will any person be allowed to land on the U. S. without a passport from a minister or consul of the United States, or if a foreigner from his own government countersigned by such minister or consul.

This regulation, however, is not to take effect in regard to persons coming from abroad, until a reasonable time shall have elapsed for it to become known in the country from which they are proceeding.

IMPORTANT FOREIGN NEWS.—Farther Point, Aug. 17.—The steamship Bohemia from Liverpool, July 8th, and Londonderry 9th, arrived at this point this afternoon.

The Times has another article bitterly sarcastic on the battle of Bull's Run. It says there must rise a gathering doubt that the Southern army is not a mere paper force.

The same article fears the question of the blockade may involve England in some difficult complication. The Times remarks that there is a cloud which although now only as large as a man's hand may yet come to overshadow the whole sky. On the last day of the session Lord Palmerston stated his views on the question.

He said in effect: "If the blockading force should allow any one vessel to evade a blockaded port by the payment of duties, the blockade from that moment is raised. A belligerent may seal up a port, but if he lets one in, his right is gone." It follows, therefore, that when a federal cruiser willingly allows a ship to pass a blockaded port, upon payment of customs, the blockade will be at an end."

An enormous advertisement appears in the Liverpool Post for a shilling subscription for a testimonial to Gen. Beauregard, in admiration of his skillful generalship.

DR. MOTT'S

CHALYBEATE

RESTORATIVE

PILLS OF IRON.

An aperient and Stomachic preparation of IRON, purified of Oxygen and Carbon by combustion in Hydrogen. Sanctioned by the highest Medical Authorities, both in Europe and the United States, and prescribed in all cases.

The experience of thousands daily proves that no preparation of Iron can be compared with it. Impurities of the blood, depression of vital energy, pale and otherwise sickly countenances, indicate its necessity in almost every conceivable case.

Inunctions in all maladies in which it has been tried, it has proved absolutely curative in each of the following complaints, viz:

In Debility, Nervous Affections, Emaciation, Dyspepsia, Consumption, Diarrhoea, Dysentery, Incipient Consumption, Scrophulous Tuberculosis, Salt Rheum, Mischiculation, Whites, Chlorosis, Liver Complaints, Chronic Headaches, Rheumatism, Intermittent Fevers, Pimples on the Face, &c.

In cases of General Debility, whether the result of acute disease, or of the continued diminution of nervous and muscular energy from chronic complaints, one trial of this restorative has proved its efficacy.
